Sodium	~360 mg

NOTABLE VITAMINS & MINERALS

- **Gruyère:** calcium, vitamin B12, and phosphorus — cheese is a genuinely dense source of all three, even in cube-sized portions.
- **Semolina flour:** B vitamins and a modest iron contribution, plus a bit more protein than an all-purpose flour would carry.
- **Gochujang:** capsaicinoids, the compounds behind chili heat, along with a touch of vitamin C from the chili itself.
- **Scallions:** vitamin K and vitamin C, in the small quantity a single slice's swirl carries.

Fermentation is associated with easier digestibility for some people, and these ingredients each bring something real to the table nutritionally — but these are general, well-established points from nutrition science, not medical claims about this specific loaf's effect on any individual. This loaf also runs saltier and sweeter-hotter than a typical sourdough, between the gochujang and the cheese — worth knowing if you're tracking sodium closely.

*Estimated, USDA-derived figures — not a lab-verified nutrition label. Baked fresh,
no preservatives.*
