Seed Spitters: A Seeded Sourdough World Tour

Bruce's Breads

Estimated, USDA-derived — per slice, 12 slices per loaf (~79 g)

Calories	~180 kcal
Total fat	~4 g
Protein	~6 g
Carbohydrates	~30 g
Dietary fiber	~3.5 g
Sugars	~0.5 g
Sodium	~180 mg

NOTABLE VITAMINS & MINERALS

- **Rolled oats:** manganese, phosphorus, and B vitamins (especially thiamin), plus a meaningful iron contribution.
- **Chia and flax (together):** this loaf's primary source of omega-3 alpha-linolenic acid, along with magnesium and phosphorus.
- **Flax specifically:** also a modest source of lignans, plant compounds studied for their antioxidant properties.
- **Sesame:** calcium, copper, and zinc — sesame is one of the more calcium-dense seeds by weight, though the amount in a single slice's worth of seeds is modest.
- **Spelt and einkorn:** contribute B vitamins and a touch more zinc and magnesium than refined bread flour alone would.

Whole grains and seeds like these contribute meaningfully to dietary fiber intake, and fermentation is associated with easier digestibility for some people — but these are general, well-established points from nutrition science, not a claim about this specific loaf's glycemic or digestive effect on any individual.

Estimated, USDA-derived figures — not a lab-verified nutrition label. Baked fresh, no preservatives.
