- 8 Cool in the mold 15–20 min, then on a wire rack for at least an hour before slicing.
- 7 Egg wash carefully, avoiding pooling at the neck. Bake at 350°F, 45–60 min, tenting once colored, to an internal temp of 190–195°F.
- 6 Proof at room temp 2–4 hrs until puffy, with a slow poke-test spring-back.
- 5 Shape the head into a tapered point; seat it deep into the socket so it reaches the bottom of the mold.

STEPS 5-8

Well Bread: A Classic Sourdough Brioche à tête

STEP-BY-STEP, CONDENSED

STEPS 1-4

- 1 Feed your stiff starter 8–12 hrs ahead (the night before) — ready when the dome flattens and just begins to crack.
- 2 Soften torn starter into cold milk & eggs (~5 min), then mix in flour & sugar, then salt. Develop to a rough windowpane before adding butter in stages. Target DDT 74–76°F.
- 3 Bulk ferment: cold retard 12–16 hrs in the fridge (recommended), or 4–6+ hrs at room temp. Look for puffy, jiggly dough with a slow poke-test spring-back.
- 4 Divide cold dough 80/20 (1,130 g body / 280 g head). Shape the body into a tight ball in a buttered fluted mold; poke a socket through the center to the bottom.
